ABOUT ME

I am a 24-year-old Software Engineer with a Bachelor's degree and over 2 years of professional experience. Highly motivated and committed, I am always eager to grow my skills and contribute effectively to projects.

EDUCATION

Software Engineering, Bachelor's Degree   Oct. 2019 - Dec. 2022

University of Zenica, Polytechnical faculty   Zenica

Electrical Engineering high school   Sept. 2015 - July 2019

JU MSŠ Gračanica   Gračanica

WORK EXPERIENCE

Full Solution   July 2024 - Present

Software Engineer / GIS software engineer   Sarajevo

- Currently developing a web application for geospatial data visualization and management using React, OpenLayers, GeoServer, and NestJS. Implemented dynamic map layers, feature interactions, and a water monitoring system as part of the platform's core functionalities.

Cape Ann Enterprises   Nov. 2022 - July 2024

Junior Software engineer   Tuzla

- Worked on a web application for managing student assessments. Focused on building dynamic UI components, integrating with API endpoints, and enhancing responsiveness and usability across the platform. (Angular, Node.js/Express.js)
- Developed new UI features for a chat application leveraging AI to enhance conversations, using React and AWS Lambda. Focused on improving user flow, responsiveness, and visual consistency across the interface.

Software Developer intern   May 2022 - Aug. 2022

- Built a web-based HR tool app based on mentor's requirements. Used React.js and Strapi.js.
